Amendments to the Claims

Please amend claim 9 as shown below. This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims

- (Original) A method for collecting a sample derived from faecal material, comprising contacting the faecal material with a fluid and subsequently collecting a sample of the fluid with a brush or brush-like device having flexible or semi-flexible bristles, wherein the sample of the fluid is collected within the bristles of the brush or brush-like device.
- 2. (Original) A method according to claim 1, wherein the fluid is water.
- 3. (Original) A method according to claim 1 or claim 2, wherein the bristles of the brush or brush-like device have a length of from 0.2 to 3 cm, preferably from 1 to 2 cm.
- 4. (Original) A method according to claim 1, wherein the sample collected with the brush or brush-like device is transferred to an assay device for subsequent testing.
- (Original) A method according to claim 4, wherein said assay device is a test device for detecting occult blood or one or more other indicators of a pathological condition in the faecal material from which the sample is derived.
- 6. (Original) A method for the detection of occult blood in faecal material, which comprises the steps of:
 - i. contacting the faecal material with water to disperse any blood present in or on the faecal material into the water.
 - ii. subsequently collecting a sample of the water with a brush or brush-like device having flexible or semi-flexible bristles, wherein the sample of water is collected within the bristles of the brush or brush-like device; and
 - iii. detecting the presence of blood, if any, in the sample.

- 7. (Original) A method according to claim 6, wherein the presence of blood, if any, in a sample is detected by means of a guaiac test.
- 8. (Original) A method according to claim 6, wherein the presence of blood, if any, in the sample is detected by means of an immunochromatographic test.
- 9. (Currently Amended) An assay kit for testing faecal material, which comprises a sample collection device which is a brush or brush-like device having flexible or semi-flexible bristles wherein a fluid sample may be collected within the bristles of the brush or brush-like device, together with means for detection of an analyte in a sample derived from the faecal material.
- 10. (Original) A kit according to claim 9, wherein the bristles of the brush or brush-like device have a length of from 0.2 to 3 cm, preferably from 1 to 2 cm.
- 11. (Original) A kit according to claim 9, wherein said means for detection is a test device for detecting occult blood or one or more other indicators of a pathological condition in the faecal material from which the sample is derived.
